## PROFESSIONAL SUMMARY

---

Software Test Engineer with 5+ years of experience specializing in end-to-end test automation for web, mobile, and API platforms. Proficient in leading QA processes, building automation frameworks with Cypress & Selenium & Playwright, and integrating testing into CI/CD pipelines. Demonstrated success in improving software reliability, reducing regression time, and mentoring team members in Agile environments.

## TECHNICAL SKILL

---

- **Automation Tools :** Selenium WebDriver, Cypress, Playwright, Rest Assured, K6, Jenkins , Postman
- **Programming Language :** Java, JavaScript/TypeScript
- **Test Framework :** TestNG, Mocha, Cucumber (BDD)
- **Testing Types:** Functional, Regression, Integration, System, UAT, API Testing, Mobile Testing
- **CI/CD & DevOps:** Jenkins, GitHub Actions, Docker
- **Database Testing:** SQL, MySQL, MongoDB (Querying, Data Validation)
- **Test Management & Defect Tracking:** JIRA, BugZila
- **Methodologies:** Agile/Scrum

## PROFESSIONAL EXPERIENCE

---

### Software Test Engineer | ESSPL, Bhubaneswar, India

Jan 2025 – Present

- Developed and maintained API automation framework using Rest Assured and TestNG, reducing backend validation time by 40%
- Integrated automated test suites into CI/CD using GitHub Actions, executing nightly regression runs and reducing manual effort by 15 hours/week
- Implemented Allure reporting for test analytics, improving defect triage efficiency by 30%
- Conducted performance testing with K6, identifying bottlenecks that improved system response time by 25%

### Senior Software Tester | Mind Spark Technology, Pune, India

Apr 2024 – Dec 2024

- Built Cypress automation framework from scratch, achieving 70% test coverage for UI regression
- Performed security and performance testing for government web applications, ensuring compliance with standards
- Managed defect lifecycle in JIRA, reducing average bug resolution time from 5 to 2 days

### Senior Software Tester | Austere Systems, Gurgaon, India

Apr 2022 – Mar 2024

- Led end-to-end testing for financial management systems, designing test strategies and coordinating UAT
- Automated financial reporting workflows using Selenium, saving 10+ hours of manual effort per sprint
- Mentored 2 junior QA engineers on automation best practices and scripting standards

### Test Analyst | Empirical Solutions, Noida, India

Feb 2021 – Apr 2022

- Created and executed 500+ test cases for web and mobile applications, ensuring 100% requirement coverage
- Documented and tracked 150+ defects in JIRA, facilitating clear communication between teams
- Performed functional, regression, and integration testing on major product release

## **PROJECT**

---

### **Maersk Global Logistics System**

- Directed end-to-end testing of a complex supply chain platform, validating the workflow from Portcall event generation (GSIS) to customs clearance.
- Conducted integration testing for multiple systems (GSIS, GCD, GCSS) and validated data processing, orchestration, and vessel scheduling.
- Performed compliance testing and verified EDI transmission to customs, ensuring seamless vessel operations.

### **CorePlus Clinical & Pathological Service**

- Integrated Ibex's Galen Prostate solution, advancing diagnostic accuracy in a high-complexity laboratory.
- Created and deployed Revenue Cycle Management (RCM) software and lab configuration tools, refining billing and lab processes and (CRM) Systems.
- Rolled out the CorePlus Service Portal, optimizing patient care and aligning with CLIA LDT regulations and CAP guidelines.

### **Anti-Corruption Department(ACB)**

- Designed a secure, intuitive web-based system for user management and case handling, enhancing administrative operations.
- Implemented features for user management, case tracking, and reporting, significantly increasing system efficiency.

### **Fund Distributes Management Systems (FDMS)**

- Built a monitoring tool for the Rural Development and Panchayat Department of Haryana and the Central Government, supervising fund distribution and utilization.
- Enabled tracking of fund allocation and implementation across administrative levels, ensuring effective resource management and transparency.

### **Human Resource Management (HRM)**

- Created an HRMS to automate and optimize employee management and recruitment processes, reducing hiring costs and improving process efficiency.
- Implemented features for automating the hiring process, from manpower requisition to candidate shortlisting, interview assessments, job offers, and salary structuring.

### **Invoice Tracker Invoice**

- Developed a mobile application to manage billing, inventory, and payments, enabling users to track inventory, monitor sales, and set payment reminders.
- Implemented functionality to send invoices in PDF format via email or messaging apps like WhatsApp and generate detailed reports for revenue, income, and pending payments, aiding better financial oversight.

## **EDUCATION**

---

### **Master of Computer Application (MCA)**

Chandigarh University Distance Education, Mohali

### **Bachelor of Computer Application (BCA)**

Bhimrao Ambedkar Bihar University, Muzaffarpur
